Introduction

II. Revised the State Definition

A student who exhibits significant intellectual and adaptive behavior deficits in their ability to plan, comprehend and reason, and ALSO indicates adaptive behavior deficits that limit their ability to apply social and practical skills such as personal care, social problem-solving, dressing, eating, using money, and other functional skills across life domains

A student with the most significant cognitive disability is a student who exhibits significant intellectual and adaptive behavior deficits in their ability to plan, comprehend, and reason and who also indicates adaptive behavior deficits that limit his or her ability to apply social and practical skills (e.g., personal care, social problem-solving skills, dressing, eating, using money) across all life domains. The student requires extensive,

direct, individualized instruction and needs substantial supports that are neither temporary nor specific to a particular content area.
